

Hackathon HQ — Workforce Platform

Tagline: Work when you want, Hire when you need.

1. Vision

Create a unified workforce platform where businesses can hire both **human workers** and **digital employees (AI)** based on the task they need completed. Instead of searching across multiple hiring websites and AI tools, businesses can find the right workforce in one place.

2. Mission

Empower small businesses with fast, affordable, and intelligent workforce solutions while creating flexible earning opportunities for people.

3. Problem Statement

Small businesses and MSMEs in India often struggle to find reliable workers when they need them, especially for short-term or specialized work. Many also want to use AI to save time, but existing AI tools are difficult to set up and use. Since current platforms offer either human hiring or AI solutions, business owners have to manage multiple services, wasting time, increasing costs, and slowing business growth.

4. Solution

One platform where businesses can hire:

-  Human Employees
-  Digital Employees

depending on the work they need done. The platform simplifies hiring by providing:

- Human workforce
- AI workforce
- Voice search
- Personalized AI memory
- Secure payments

5. Target Users

Business Owners

Examples: Cafes, Restaurants, Bakeries, Hospitals, Retail Stores, Freelancers, Startups, Small Businesses

Goals:

- Find workers quickly
- Save hiring time
- Use AI without technical knowledge

Job Seekers

Examples: Students, Freelancers, Daily wage workers, Part-time workers

Goals:

- Earn extra income
- Find flexible jobs
- Apply easily

6. User Roles

Business Owner — Can:

- Search workforce

- Hire humans
- Hire digital employees
- Make payments
- Manage workforce

Job Seeker — Can:

- Create profile
- Browse jobs
- Apply for jobs
- Track applications

7. Core Concept

Businesses don't hire AI tools. Businesses hire **employees**.
Our platform treats AI as **Digital Employees** instead of chatbots.

8. Digital Employees (MVP — not yet final)

- 🗣️ **Digital Marketing Executive** — Instagram captions, product descriptions, marketing emails, ad copy
- 📊 **Digital Business Analyst** — CSV analysis, sales insights, business summaries
- 📄 **Digital Documentation Executive** — Proofreading, grammar correction, document rewriting, formatting
- 👤 **Digital HR Executive** — Job descriptions, resume summaries, interview questions, candidate evaluation

9. Human Workforce

Waiter, Cashier, Receptionist, Cleaner, Delivery Executive, Salesperson, Office Assistant

10. MVP Features

Authentication

- ☐ Login
- ☐ Signup
- ☐ Role Selection

Business Dashboard

- ☐ Search workforce
- ☐ Browse workforce
- ☐ Hire
- ☐ Payment
- ☐ My Workforce

Job Seeker Dashboard

- ☐ Create profile
- ☐ Browse jobs
- ☐ Apply

AI Workspace

- ☐ Dedicated workspace per Digital Employee

Payments

- ☐ Demo Payment / Razorpay Test Mode

Deployment

- ☐ Live Website

11. Should Have Features

- Voice Search
- Search Suggestions
- Ratings
- Saved Workers
- Profile Pictures
- Dark Mode

12. Future Scope

- AI Phone Receptionist
- Payroll
- Attendance

- Chat
- Video Interviews
- WhatsApp Integration
- Analytics Dashboard

13. User Journey

Business Owner

Landing Page → Login → Business Dashboard → Search Work → Suggested Workforce → View Details → Hire → Payment → My Workforce → Complete Task

Job Seeker

Landing → Signup → Profile → Browse Jobs → Apply → Application Submitted

14. Website Structure (Site Map)

```

Landing Page
├── Login
├── Signup
├── Business Dashboard
│   ├── Home
│   ├── Search
│   ├── Human Workforce
│   ├── Digital Workforce
│   ├── My Workforce
│   ├── Payments
│   └── Profile
└── Job Seeker Dashboard
    ├── Home
    ├── Browse Jobs
    └── Applications
  
```

└ Profile
└ Resume

15. Wireframes (Screens)

Screen	Elements
Splash	Logo, Animation, Login, Signup
Login	Email, Password, Login
Signup	Name, Email, Password, Business / Job Seeker
Dashboard	Greeting, Search, Quick Suggestions, Human Workforce, Digital Workforce
Employee Details	Description, Skills, Pricing, Hire
Payment	Amount, Proceed
AI Workspace	Task Input, Generate, Output, Copy

16. AI Partner Integrations

Mem0 (Primary Integration)

Purpose: Business Memory

Stores: Business Name, Industry, Previous hires, Preferred writing tone, Previous interactions

| *Welcome back, Sweet Crumbs Bakery!*

Gnani.ai (Primary Integration)

Purpose: Voice Search

Business owner speaks → Speech → Text → Search

Keploy

Purpose: Backend API Testing — Mention in PPT

Slashy

Conceptual integration — Powers Digital Marketing Executive workflows. No direct API integration.

✗ Alchemyst AI

Not included — Overlaps with Mem0.

✗ Outlier

Not included — Does not directly strengthen MVP.

17. Architecture

```
Business Owner
↓
Gnani.ai
↓
Search Engine
↓
Human Workforce OR Digital Workforce
↓
Payment
↓
Workspace
↓
Mem0
↓
Personalized AI Experience
```

18. Tech Stack *(not finalized)*

Layer	Technology
Frontend	React / Next.js
Backend	Node.js + Express
Database	MongoDB

Layer	Technology
Authentication	Firebase Auth or JWT
Payments	Razorpay Test Mode
Deployment	Vercel (Frontend), Render/Railway (Backend)

19. Demo Flow (3 Minutes)

1. Landing Page
2. Login as Business Owner
3. Mem0 welcomes returning user
4. Click microphone (Gnani.ai) or type: *"I need help with marketing."*
5. Digital Marketing Executive appears
6. View employee details
7. Hire employee
8. Complete demo payment
9. Workspace opens
10. Generate marketing content
11. Copy result
12. Show "My Workforce"

21. Submission Checklist

- ☐  GitHub repo (*public, with README*)
- ☐  Demo video (*max 3 min*)
- ☐  Pitch deck (*10 slides*)
- ☐  Working product (*live URL*)
- ☐  Problem statement (*1 page*)
- ☐  Live demo (*3-min slot — see Section 19 for flow*)

20. Elevator Pitch (*30 seconds*)

Our platform brings human workers and AI-powered digital employees together in one marketplace. Small businesses can simply describe the work they need, hire the right workforce, complete a secure payment, and get the task done—all from a single platform. By combining AI memory through Mem0, voice interaction using [Gnani.ai](#), and specialized digital employees, we make hiring faster, smarter, and more accessible for India's growing small businesses.
